Stake Puller

Simplicity - Performance - Style

Stake Puller

The Baytex Stake Puller is the fastest tool on the market for removing large numbers of stakes. Available in two options: Standard for regular stakes and Structure for structure stakes

Key Features

- One piece design with interchangeable heads for different stake diameters
- Works on pillar jack principle
- Light weight, easy to carry and move
- Large stable base won't sink into soft ground
- Ergonomically designed to minimise back strain
- Structure puller has extra tongue to lever base plates
- Structure puller is ideal for removing single head stakes

Specifications

Leverage: 10:1 (approx)
Weight: 11.5kg (25lb)
OA Height: 1600mm (63")
